

# Student Roundtable

## Step 1 – Research

Convene a student roundtable of 15-20 students to discuss the issues and priorities they see as most pressing for them and their community.

- Are there organizations they recognize as making real contributions in the areas they care about?
- What real-world skills are they eager to build?

## Step 2 – Reflect

Share the results and discuss these questions:

- What 2-3 issues could potentially serve as the focus for partnerships and curriculum within your school? Remember, these are just the starting point.

Now brainstorm a list of 5-6 possible partners you might work with and projects or learning experiences you might design.

Student Ideas	Partner Possibilities
