**Insights and Next Steps****How to best use the space below:**

Create a high-level sample schedule to illustrate a week for one student—maybe an incoming 9th grader—showing not just time blocks, but also where learning will happen, with whom, and using what tech tools.

**Consider:**

How much might this schedule vary for different students, over the course of the year, or over a student's high school career? Create additional schedules to illustrate your thinking.

**Turn on reflective collaboration:**

Share your sample schedules with students, teachers, families, and community partners. Take note of what excites them, and what questions or concerns they have.
