Where Students Learn

Step 1 – Research

Find out where in your community students are already going to learn, volunteer, contribute—then look for lessons.

Step 2 – Reflect

Share findings with your team and explore these questions:

- Where is learning happening in your community? How can you capitalize on those assets?
- What are the implications for your school design?

Where young people are learning in our community	Activity	What students value

How might we leverage these assets in our school design?

A large grid of small red dots on a white background, intended for writing or drawing. The grid consists of approximately 30 columns and 40 rows of dots, providing a structured space for students to explore their ideas on leveraging assets in school design.
