XQ Competency Rubric
and other tools.

Which XQ
Competencies could
students develop
outside the classroom?
Use the cards to
brainstorm with
community partners.

Competencies

3. Choose your XQ Competencies

Which XQ Competencies could students develop as they learn the content? Persuasive communication? Logical thinking? Select 3-4 cards that would deepen the student experience.

4. Bring it all together

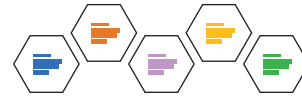

Give your learning experience a name, and start planning. What will students learn, do, and produce? How will they be assessed?

Explore the XQ Competency Rubric

We've mapped each XQ Competency to a four-level journey of student attainment. Download the XQ Competency Rubric at xqsuperschool.org.

Welcome to the XQ Competencies!

These cards will help you explore the XQ Competencies, which describe the knowledge, skills, and social-emotional capacities all young people need. Use the cards to design learning experiences—and more.

1. Get to know the cards.

Each card features one of the 37 XQ Competencies. The competencies align with the five XQ Learner Outcomes, indicated by the five colors.

2. Imagine a learning experience.

Start with the academic content your students need to learn, based on your state and local standards. Cell division? The Harlem Renaissance? Write that on an Academic Content note.
